MERN STACK DEVELOPER | FULL STACK DEVELOPER

SUMMARY

Computer Engineering graduate with hands-on experience building and deploying full-stack web applications using the MERN stack. Experienced in developing responsive React.js frontends, Node.js and Express.js REST APIs, MongoDB databases, role-based access control, real-time communication, PWA applications, and third-party API integrations. Built end-to-end products for campus users and a real-world client, including AI-powered search, speech-to-text, analytics, document generation, and workflow automation. Strong foundation in Data Structures and Algorithms, DBMS, OOP, Operating Systems, and Computer Networks.

TECHNICAL SKILLS

Languages: JavaScript, Java, SQL

Frontend: React.js, HTML, CSS, Tailwind CSS, Progressive Web Apps (PWA)

Backend: Node.js, Express.js, REST APIs, API Integration

Databases: MongoDB, Mongoose, MySQL, Database Design, Indexing, SQL Joins

AI & APIs: LLM API Integration, Prompt-Driven Search, Speech-to-Text APIs

Tools: Git, GitHub, Postman, VS Code

Computer Science: Data Structures & Algorithms, DBMS, Object-Oriented Programming, Operating Systems, Computer Networks

PROJECTS

CampusNet — Private College Social Network | [Live](#) | [GitHub](#)

Technologies: React.js, Node.js, Express.js, MongoDB, Mongoose, LLM APIs

- Developed a full-stack private social networking platform for college students, clubs, and communities using the MERN stack.
- Built an AI-powered search feature that processes natural-language queries and identifies relevant students, clubs, and communities.
- Implemented complete club management workflows including recruitment applications, accept/reject functionality, event registration, QR-code ticketing, and scan-based attendance with duplicate-scan prevention.
- Developed Discord-style community forums with group chat and connection-based one-to-one messaging.
- Implemented role-based access control for students, club presidents, and administrators across React frontend, Express/Node.js backend, and MongoDB database layers.
- Built analytics functionality and integrated LLM APIs to generate narrative summaries for club presidents and college administrators.
- Developed administrative functionality for bulk student onboarding and content moderation.

Archiform — Internal Administration Tool

Technologies: React.js, Node.js, Express.js, MongoDB, Mongoose, Tailwind CSS, PWA, SheetJS, pdf-lib

- Developed a full-stack internal web application for an architecture firm to streamline client requirements, meeting documentation, and quotation workflows.
- Built an AI-powered meeting-notes module that records browser audio, integrates speech-to-text transcription, generates structured summaries, and stores notes against clients and dates.
- Developed an automated quotation workflow that parses uploaded Excel spreadsheets using SheetJS and generates client-ready PDF quotations using pdf-lib.
- Built and deployed the application as an installable Progressive Web App (PWA), enabling the same codebase to run across desktop and mobile devices.
- Designed and implemented React.js frontend components using Tailwind CSS and developed REST APIs using Node.js and Express.js.
- Implemented MongoDB data models using Mongoose for storing client information, meeting records, and application data.
- Integrated hosted speech-to-text and LLM APIs to automate document and meeting-related workflows.
- Translated non-technical client requirements into application functionality and a working technical solution.

EDUCATION

Smt. Kashibai Navale College of Engineering, Pune | B.E. Computer Engineering | CGPA: 7.83/10 | 2022 – 2026

Amrita Jr. College, Nigdi | XII Science | 87.83% | 2019 – 2021

Arya Vidya Mandir, Pimpri | SSC | 86.40% | 2018 – 2019

PUBLICATION & ACHIEVEMENTS

- Co-authored the peer-reviewed research paper “CampusNet: An AI-Augmented, Proximity-Preserving Social Platform for Campus Engagement”, published in the International Journal of Scientific Research in Engineering and Management (IJSREM), Vol. 10, Issue 5, May 2026. DOI: 10.55041/IJSREM64385.
- Member, SKN IEEE Student Branch; co-hosted and volunteered at technical events and sessions involving event coordination, team management, and public communication.
